

Air conditioning does much more than heat and cool the space you live and work in. Daikin air conditioning allows you to obtain an ideal temperature in your home, providing your family comfort all year round.

A Daikin Specialist Dealer is your expert when it comes to providing the comfort of quiet, energy efficient air conditioning. With over 450 Daikin Specialist Dealers across Australia and New Zealand, there's sure to be one near you.

## Ducted Air Conditioning Explained

A Daikin ducted system provides air conditioned comfort throughout your entire home. It can be installed in a new home or tailored to suit an existing one. The indoor unit is located within the ceiling or under the floor, with flexible ducting distributing conditioned air through vents located in chosen areas throughout the house. The condensing unit is installed outside the home.

#### **DID YOU KNOW...**

Daikin Ducted
Indoor units are
designed and built in
Australia in our very
own manufacturing
facility in Sydney.\*

#### FLEXIBILITY

Daikin ducted air conditioning gives you the flexibility to heat or cool every room in your home through the use of ducts, these are then 'zoned' - and how you 'zone' your home is up to you. An example of this is you may want to zone all the bedrooms in zone 1, the living areas in zone 2 and so on.

# THE RIGHT FIT FOR ANY HOME – NEW OR EXISTING

If you are building a new home, your Daikin Specialist Dealer can work with you from the planning stage to tailor a ducted system to suit your specific needs. From the initial quote to installation, your Daikin Specialist Dealer will ensure that when you move into your new home, you'll enjoy whole house comfort.

If you already live in your home, Daikin ducted air conditioning can be tailored to fit an existing building. A Daikin Specialist Dealer will come to your home, talk through your requirements and provide a range of options to choose from.

#### TIP IE VOL

IF YOU ARE BUILDING A NEW HOME, ARRANGE A DAIKIN DEALER TO VISIT YOU TO GO THROUGH YOUR PLANS AND HELP YOU WITH A QUOTE.

# A handy addition to any ducted air conditioning system...

#### **Air Purifier Filters:**

EASY CLEANING AND MAINTENANCE

## Daikin's i-text\*

#### KEEPING AN EYE ON YOUR AIR CONDITIONER FROM A DISTANCE

#### ARRIVING HOME TO A COMFORTABLE TEMPERATURE

#### **INSTANT NOTIFICATION** IF ANYTHING GOES WRONG

# FEATURES AND benefits\*

#### **EFFICIENT**

The **Home Leave** function can be selected when leaving the house so that your air conditioner will operate at a pre-selected temperature. Alternatively it can also be used to record your preferred (default) settings.

**Automatic Changeover** mode allows automatic selection of cooling or heating modes to suit the thermostat settings and prevailing room temperature.

**Program Dry** mode gives priority to reducing the level of humidity in the room rather than room temperature.

**Auto Restart** mode memorises the settings on the controller before a power outage and restarts the unit to the same operating conditions when power is restored.

#### **FASY TO OPERATE**

**Self Diagnostics** allows fast and easy diagnostics by monitoring the operation of the system and displaying a malfunction code in the unlikely event of a problem developing with the system.

**Automatic Defrosting** is carried out to minimise the amount of frost on the outdoor heat exchanger ensuring efficient and high performance in winter.

**24 Hour On/Off Timer** can be pre-set to start and stop the air conditioner at any time within a 24 hour period. Once the times are set, the air conditioner can be operated for a period by simply pressing the ON or OFF timer buttons.

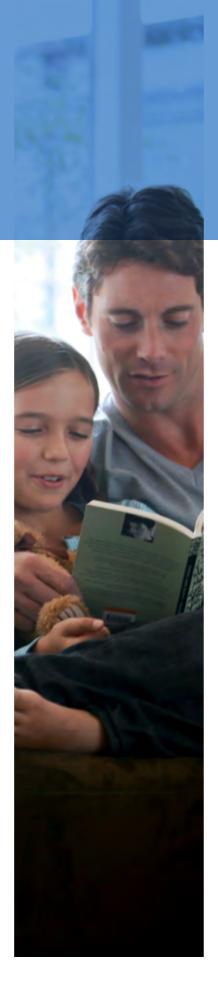

#### DESIGN

**Indoor Unit Designed** and built in Australia (except FDXS series).

**Compact Design** of indoor units allows installation into limited roof space.

**Indoor Units** can be dismantled for easier installation into confined roof spaces.

**Outdoor Unit Quiet Mode** reduces the operating noise of the outdoor unit for times when low noise operation is required.

### Daikin's Ducted **Zone Controller**

Using the latest Japanese technology, Daikin's ducted zone controller was developed in Australia specifically for Australian & New Zealand conditions. So you can now control your Daikin ducted system to deliver ultimate comfort to different areas of your home. Daikin's state-of-the-art ducted zone controllers have innovative features to make it easy for you to enjoy the comfort of your own home even more.

There are four models to help you tailor your Daikin ducted system exactly to your needs, providing you with the right level of comfort where and when you want it.

There is a backlit display to make it easy for you to view the controller's functions. Its advanced design gives you the flexibility to install your controller in a location of your choice. Plus the easy to read type rather than symbols makes this controller even more user friendly.

#### AN FASY CHOICE

The ability of a Daikin ducted system to deliver ultimate comfort is maximised by your choice of controller.

There are four available so you can match one to the size and number of zones in your home with the controller that's right for your needs.

Any one of these new Daikin ducted controllers can put you in the zone – the ultimate comfort zone.

- BRC230Z4 for up to four zones (230 240 volt damper motors)
- BRC230Z8 for up to eight zones (230 240 volt damper motors)
- BRC24Z4 for up to 4 zones (24 volt damper motors)
- BRC24Z8 for up to 8 zones (24 volt damper motors)
- BRCSZC second controller ideal for double storey or larger homes

#### EASY TO SET UP AND PROGRAM

The three different timer and time clock operations of the Daikin Ducted Zone Controller makes it easy for you to enjoy ultimate comfort when and where you want it.

The Countdown On-Off Timer programs your ducted system to be turned on and / or off after a pre-set number of hours. You can select this pre-set time in 1 hour increments from 1-12 hours. The unit starts counting down from the moment it has been set and the timer is non-repetitive.

The Simple 7-day Time Clock allows the user to program the controller to turn the Daikin Ducted System on and / or off at set times for every day of the week. Up to two on and two off programs can be set for each day to suit your lifestyle. You can link modes and set temperatures to each program.

The Comprehensive 7-Day Timer Clock does everything the simple 7-day Time Clock does and more. Zone on-off control and temperature sensor selection can also be programmed into the Time Clock giving you an even greater ability to tailor the system to suit your lifestyle.

## Controllers

# NAV EASE CONTROLLER (STANDARD)

Key Features:

- Backlit display
- Adjustable off reminder timer
- Large buttons and arrow keys for simple operation
- Guide on display
- Weekly schedule timer
- Multilingual display available

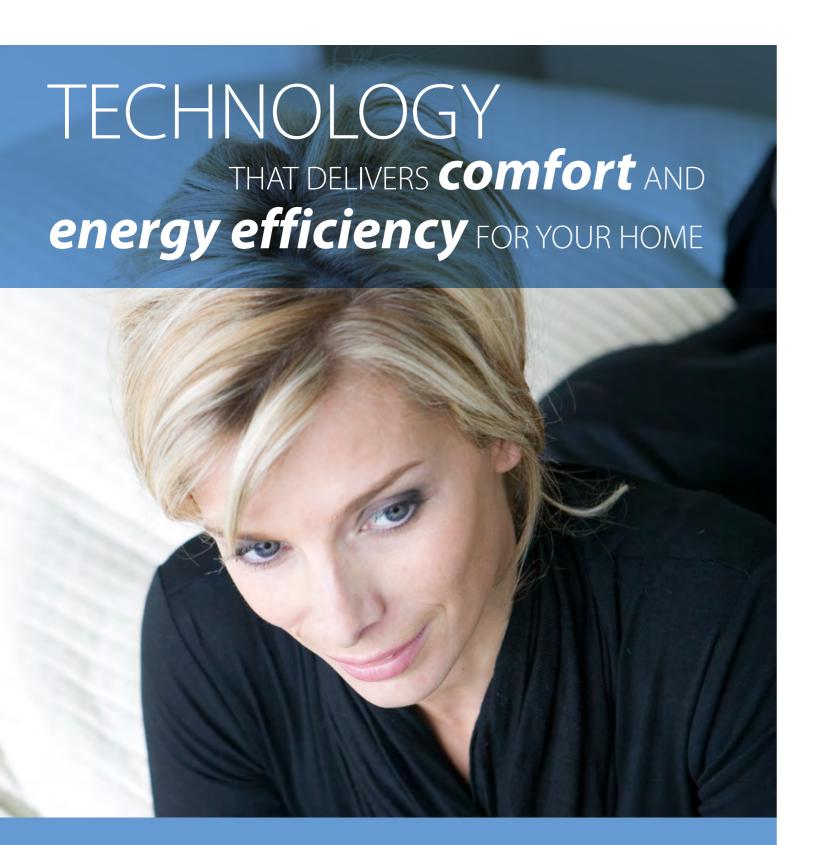

# ZONE CONTROLLER (OPTIONAL UPGRADE)

Key Featu

- Ability to program your system to turn on/off afte a pre-set number of hours
- Ability to zone your home for ultimate comfort control
- Up to two on and two off programs can be set for each
- Ability to link modes and set temperatures to each progran
- Filter cleaning reminder periodically alerts you to clean filters

#### DAIKIN'S INVERTER DIFFERENCE

Daikin Inverter air conditioners are more powerful and more energy efficient than conventional, non-Inverter models.

Conventional air conditioners operate at a fixed speed, delivering a fixed amount of cooling and heating. A Daikin Inverter has more advanced technology that operates more intelligently. The principle is simple: Inverters adjust the power to suit your actual requirements – no more, no less.

The Inverter continuously adjusts its cooling and heating output in accordance with the temperature in the room. When the desired temperature is reached, Inverter technology ensures it is constantly maintained – keeping you comfortable at the same time as running more efficiently.

#### NOTES:

- 1. Rated capacity is measured in accordance with AS/NZS 3823.1.2
- 2. The cooling (or heating) capacities will be reduced below the rated values as the outside temperature approaches the maximum (or minimum) temperature limits.
- 3. Outdoor sound pressure levels are determined in accordance with JIS8615.
- 4. Outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions.
- 5. Outdoor sound power levels are determined in accordance with EPA regulations.
- 6. The Daikin 5 year warranty applies only to products in this brochure purhcased and installed in Australia and New Zealand. It does not apply to any non Daikin components used in the installation (e.g ducting, air outlets, zone motors etc.)
- 7. The Queensland and South Australian Governments have introduced energy efficiency requirements that are no longer consistent with the Australian Standard. As a consequence, certain models displayed in this brochure may not be available for sale in your state. For confirmation on model availability or alternatives please contact your Daikin Specialist Dealer.
- 8. The specifications, designs and information in this brochure are subject to change without notice. Unit colours shown are as close as possible to actual unit colours. Colours depicted in this brochure may vary slightly.

# YOU KNOW YOU CANTRUST Daikin

#### DAIKIN. A PARTNER YOU CAN RELY ON

Daikin has been around for more than 80 years. This success is based on hard work and innovation. With over 33,000 employees worldwide, Daikin has always been at the cutting edge of technology with one goal in mind – to provide comfort through air conditioning. Only a market leader can give you the Daikin level of service and quality control. Daikin has been providing comfort to Australian and New Zealand homes for over 40 years, with offices all over Australia and New Zealand and a strong network of over 450 Daikin Specialist Dealers you can rely on.

# LOCAL AFTER SALES SUPPORT

Daikin has an established service department. A dedicated in-house call centre, spare parts division and technical support centre for all technical enquiries, ensure prompt after sales support for all Daikin customers. All Daikin Specialist Dealers and installers receive thorough training and education to deliver first-class sales support – from your initial consultation through to all after sales enquiries.

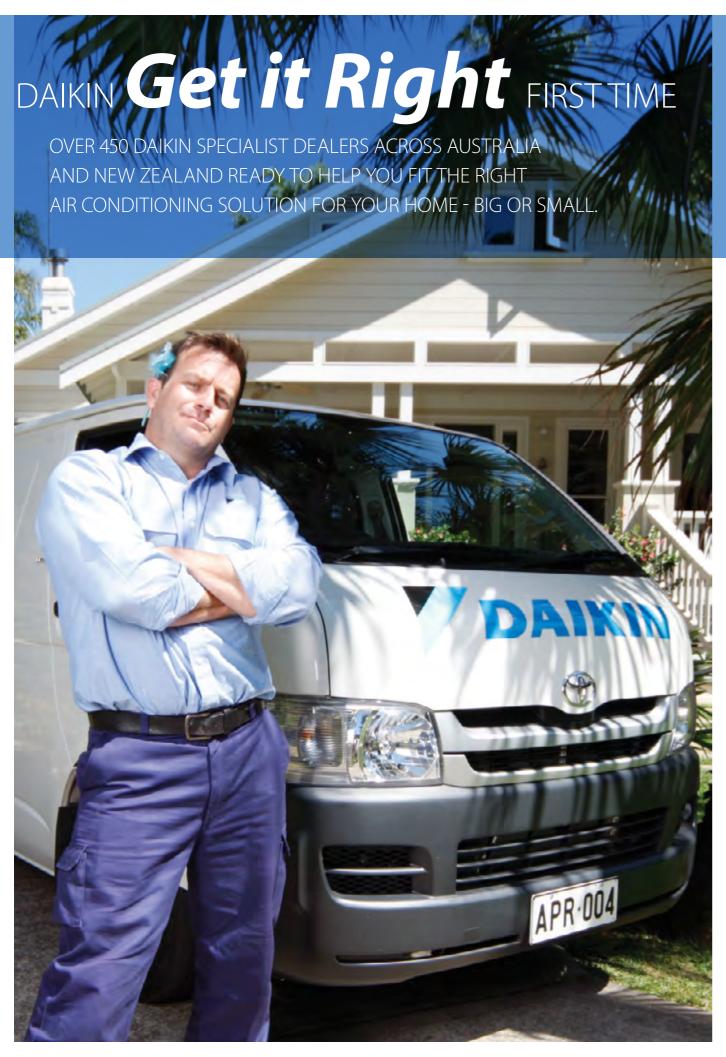

#### MINIMUM ENERGY PERFORMANCE STANDARDS

From the 1st of October 2001, ducted and non ducted air conditioners of the vapour compression type with a cooling capacity of up to 65kW, manufactured in or imported into Australia and New Zealand, are required to comply with the Minimum Energy Performance Standards (MEPS). These requirements are set out in Australian and New Zealand Standard 3823.2-2009.

Since 2001 MEPS levels have progressively increased and on the 1st of April 2010, the lastest increase in levels came into force. Today, developed countries like Australia are turning to such programs to increase the overall efficiency of air conditioners in the marketplace.

Daikin is committed to providing air conditioning solutions that are energy efficient, quiet, simple to use and reliable, ensuring our units exceed the minimum MEPS requirements.

# 4 STEPS TO A successful installation

# Trust a Daikin Specialist Dealer

Selecting a Daikin Specialist Dealer will help you obtain an efficient, reliable installation with the best possible service and advice to help you get the right Ducted System for your home.

# Measure, Quote and Install

Your Daikin Specialist Dealer will come to your home to carefully evaluate your needs and will then provide you with a detailed cost estimate.

Next is the installation stage. Here your Daikin Specialist Dealer is your assurance that the work will be performed cleanly, quickly and safely.

# **3**Warranty

The Daikin 5 year parts and labour warranty applies to all products in this brochure, purchased and installed in Australia or New Zealand.

# Maintenance

For your peace of mind, entrust the regular maintenance of your system to a Daikin Dealer - this way, you will optimise the performance and longevity of your unit.

#### **Assumptions**

All representations made in Daikin marketing and promotional material are based on the assumptions that the correct equipment has been selected, appropriately sized and installed in accordance with Daikin's installation instructions and standard industry practises.

Head Office / Tokyo Office Certificate number: EC02J0355 Shiga Plant (Japan) Certificate number: EC99J2044 Sakai Plant (Japan) Certificate number: JQA-E-80009 Daikin Industries Ltd (Thailand) Certificate number: JQA-E-90108 Yodogawa Plant (Japan) Certificate number: EC99J2057

#### **Environmental Qualifications**

Daikin Industries Limited has received ISO 14001 Environmental Certification for the Daikin production facilities listed below. ISO 14001 is an international standard specifying requirement for an environmental management system, enabling an organisation to formulate policy and objectives, taking into account legislative requirements and information about significant environmental impacts. It applies to those environmental aspects within the organisation's control and over which it can be expected to have an influence.

The certification relates only to the environmental management system and does not constitute any endorsement of the products shipped from the facility by the International Organisation for Standardisation.

#### **Quality Certifications**

Daikin Industries Limited is the first air conditioning equipment manufacturer in Japan to receive the ISO 9001 certification. All Daikin manufacturing facilities have been certified to ISO 9001 Quality Management System requirements. ISO 9001 is a certificate for quality assurance concerning 'design, development, manufacturing, installation and related service' of products manufactured at that factory.
